

EXTREME FIRE  
**FIRE TOWER**

STAINLESS STEEL FIRE PIT

- ❖ LARGE HEAT REACH
- ❖ GREAT FOR GATHERINGS
- ❖ PORTABLE & LIGHTWEIGHT

**THE PERFECT GATHERING PIT TO KEEP THE HEAT GOING AROUND!**

Unlike traditional "smokeless" fire pits that force all the heat straight up, the FireTower's patent-pending design pushes the heat outward for 20 feet, keeping you and your guests at a comfy 80 degrees. The FireTower, however, burns upwards at 800°F, but also radiates the heat in all directions, out to about 20 feet around, raising the surrounding temps to around 80°F. This allows your guests to spread out, mingle, and enjoy themselves in the warmth of your FireTower fire pit.

MODEL NO. #50201

FIRE TOWER PORTABLE FIRE PIT
